Brand Overview

About Encik Beku

Encik Beku is an established service company in Malaysia, specializing in air conditioning services with a strong presence across Kuala Lumpur / Shah Alam (HQ), Negeri Sembilan, Johor Bahru, and Penang. The company provides complete aircond solutions, including installation, repair, maintenance, and supply for residential and commercial clients.

In addition to air conditioning, Encik Beku also offers various technical and renovation services under dedicated sub-brands, creating a convenient one-stop solution for homes and businesses. Supported by dedicated service websites and digital marketing, Encik Beku continues to grow as a fast, reliable, and affordable service provider in Malaysia.

Vission

To become a leading one-stop air conditioning and technical service provider in Malaysia, recognized for fast response, reliable service, and practical solutions for homes and businesses.

Mission

To deliver affordable and high-quality services supported by skilled workmanship, professional service standards, and a smooth customer experience across every project and touchpoint.

Brand Value

Encik Beku is built on a foundation of reliability, speed, and value-driven service, ensuring every customer receives efficient, practical, and trustworthy solutions.

Reliability

We deliver consistent and dependable service, ensuring every job is completed with professionalism and care.

Speed & Efficiency

We prioritize fast response and efficient execution to minimize waiting time and complete jobs promptly.

Affordability

We provide competitive and fair pricing, making quality air conditioning services accessible to more customers.

Quality Workmanship

We maintain high standards in every service, ensuring long-lasting results and customer satisfaction.

Customer-Focused

We focus on understanding customer needs and delivering practical solutions with a smooth and hassle-free experience.

Logo System

Logo Rational

The Encik Beku logo represents the brand's core identity as a reliable and efficient air conditioning service provider, while also reflecting its broader role as a one-stop solution through multiple supporting services. The visual elements are designed to convey skilled workmanship, strong performance, and dependable service, aligning with the brand's focus on delivering fast and effective cooling solutions.

At the same time, the overall design reflects structure and versatility, representing Encik Beku's ability to operate across different service areas under dedicated sub-brands. This reinforces the brand's positioning as a trusted and scalable service provider, combining specialized expertise with a consistent and professional customer experience.

Primary Logo

The Primary Logo is the main visual identifier of Encik Beku and should be used in the majority of brand applications. It combines the technician icon with the Encik Beku wordmark, representing skilled workmanship and strong brand presence.

Consistent use of the primary logo reinforces brand recognition, strengthens visual identity, and ensures a cohesive and professional appearance across all touchpoints.

Secondary Logo

The Secondary Logo is an alternative version of the Encik Beku visual identity, designed for use in applications where the primary logo may not be suitable due to space or layout constraints. It presents a more compact, horizontal format while retaining the core brand elements.

Consistent use of the secondary logo ensures flexibility without compromising brand recognition, allowing the identity to remain clear and cohesive across different formats and touchpoints.

ENCIK BEKU

Logo Variations

The Encik Beku logo is available in different variations to ensure visibility and consistency across various backgrounds and applications.

The standard logo version with dark typography should be used on light or neutral backgrounds for maximum clarity and brand recognition. For dark or low-contrast backgrounds, the alternate version with white typography and white outline should be used to maintain strong visibility and readability across all touchpoints.

Light Background

Dark Background

Clear Space

Clear space is the area surrounding the Encik Beku logo where no other elements may appear. This space must be kept free of text, graphics, and other visual elements to ensure the logo remains clear and visible.

The clear space ensures the logo stands out effectively in all applications. When placed too close to other elements, the logo's impact and legibility may be reduced.

Minimum Size

Establishing a minimum size ensures that the Encik Beku logo remains clear, legible, and visually impactful across all applications. Using the logo below the recommended size may reduce clarity and affect overall recognition.

For digital applications, the minimum size for the Primary Logo is 50px in width, while the Secondary Logo should not be used smaller than 120px in width to maintain clarity on screen.

For print applications, the Primary Logo should not be reproduced smaller than 12mm in width, while the Secondary Logo should not be smaller than 24mm, ensuring a sharp and professional appearance across all printed materials.

Minimum size for screen

50 px

120 px

Minimum size for print

24 mm

Single Color Logo

The single-color logo should be used when the primary or secondary logo is not suitable due to visibility or reproduction limitations. This includes situations where the full-color logo may appear unclear or lacks contrast against certain backgrounds.

Single-color applications ensure the logo remains clear and legible, especially when background images or production methods affect visibility. Only neutral colors (black and white) or approved colors from the Encik Beku color palette should be used to maintain consistency across all applications.

Logo Misuse

To protect the integrity of our brand, the logo must always be used as provided without any alterations. Misuse can weaken our recognition, reduce legibility, and create inconsistency across branded materials. The following examples illustrate common mistakes that must be avoided.

1. Do not use unapproved colors in the logo
2. Do not place the logo on background that reduce legibility
3. Do not change the typeface nor recreate or manipulate the wordmark and the icon
4. Do not crop or remove any parts of the logo
5. Do not outline or create keyline around the logo
6. Do not rotate the logo
7. Do not distort or warp the logo in a way
8. Do not add drop shadow or any other effects

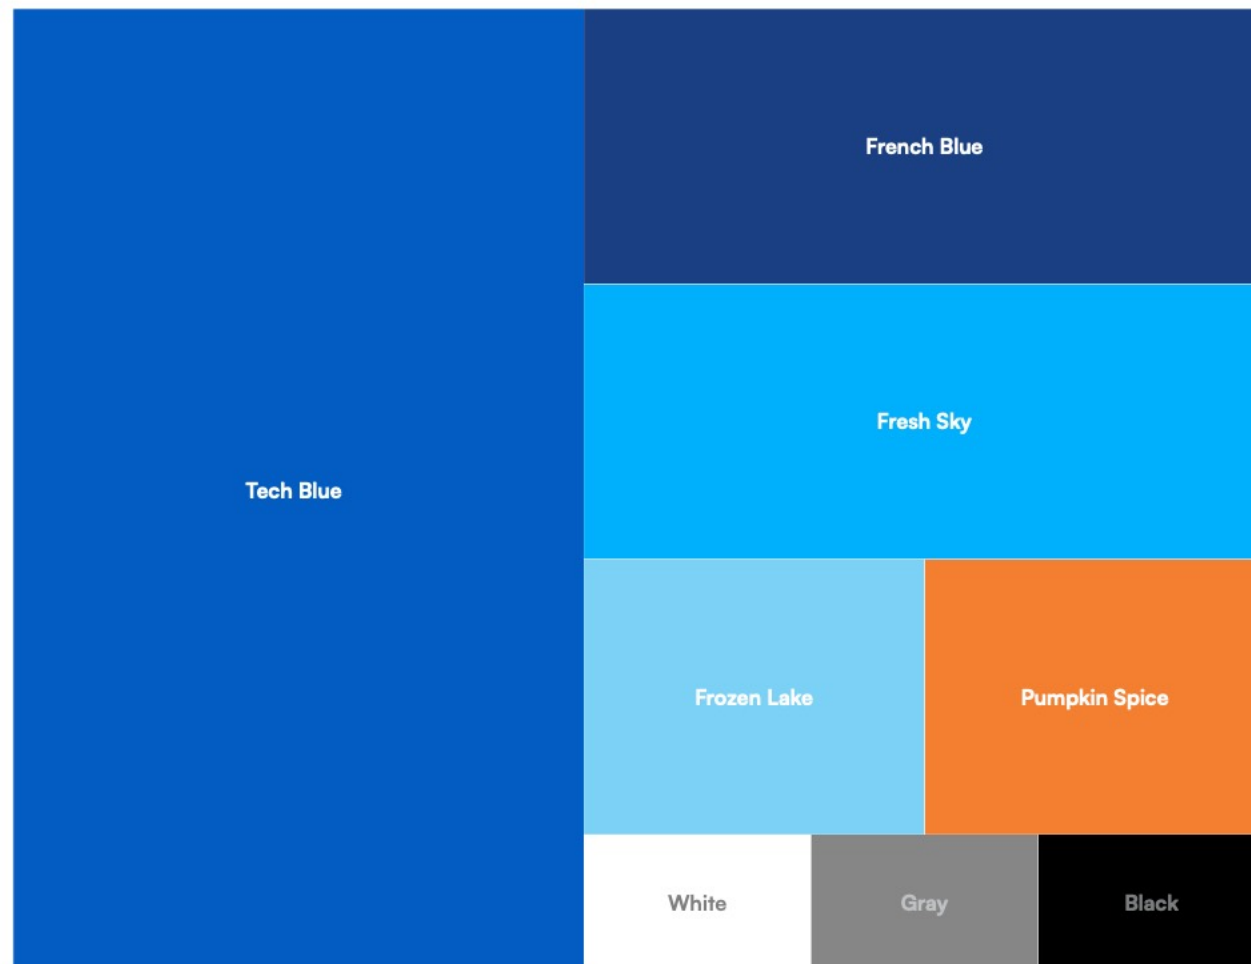

Color System

Color Philosophy

Encik Beku's color system is built around shades of blue, complemented by a bold orange accent to reflect the brand's core identity in air conditioning and technical services. The use of blue tones from Tech Blue and French Blue to Fresh Sky and Frozen Lake represents cooling, reliability, and performance, reinforcing the brand's expertise in delivering effective and consistent solutions.

The orange accent (Pumpkin Spice) is used strategically to highlight key actions and important information, adding contrast and energy to the overall visual identity. This balance creates a clean, professional, and high-impact look while maintaining clarity and strong brand recognition across all touchpoints.

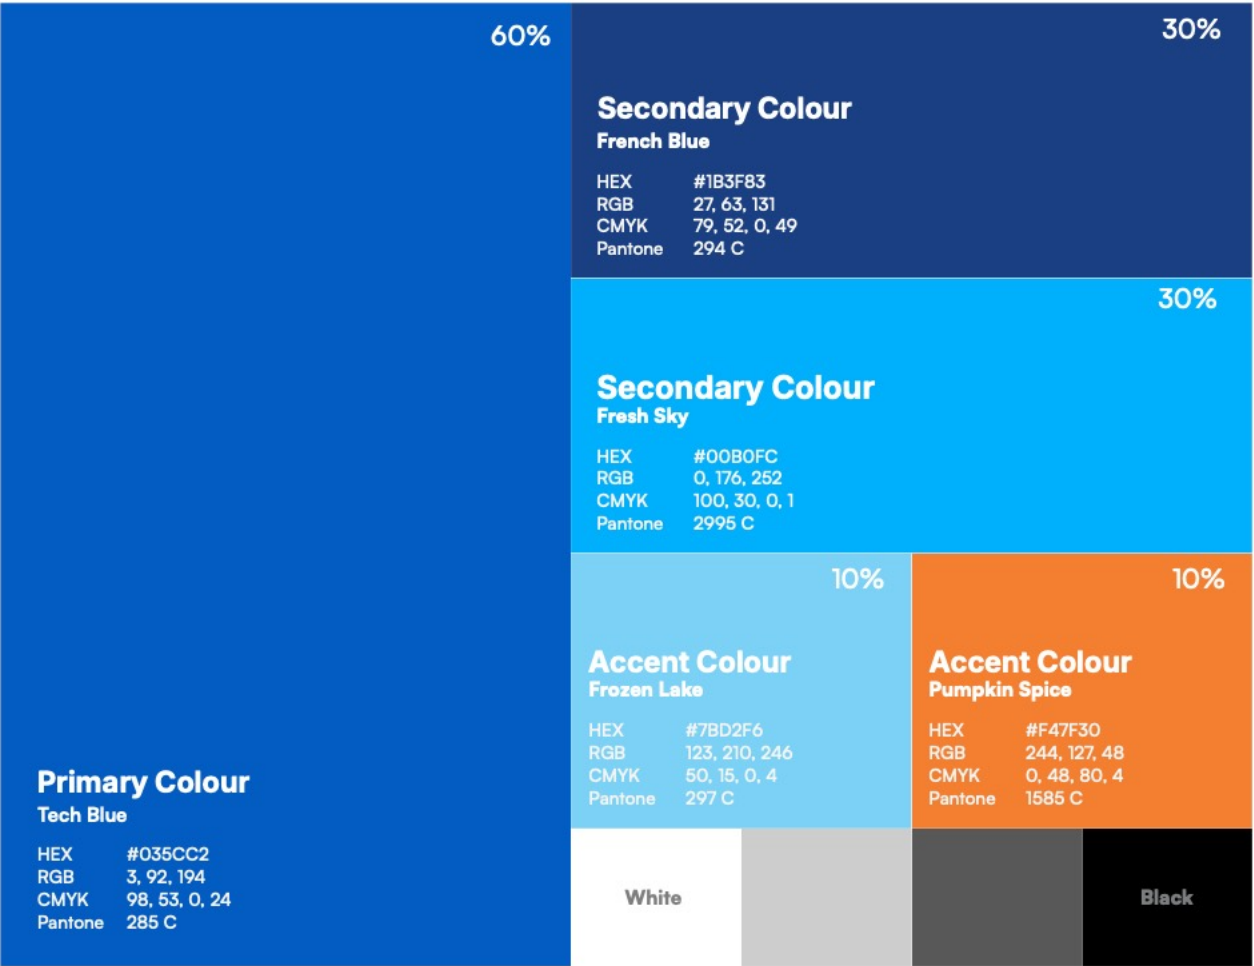

Color Pallete

The Encik Beku color palette is structured to ensure a balanced and consistent visual identity across all applications. The primary color, Tech Blue, serves as the dominant color and should be used for approximately 60% of the overall design to establish strong brand recognition. Secondary colors, including French Blue and Fresh Sky, play a supporting role and should be used for around 30% of the design. These colors help create depth, variation, and flexibility while maintaining a cohesive look.

Accent colors, Frozen Lake and Pumpkin Spice, should be used sparingly at approximately 10% to highlight key elements such as calls to action and important information, ensuring strong visual impact without overwhelming the design.

Neutral colors, including black and white, are used primarily for text and callout backgrounds to ensure readability and proper contrast across all applications.

Each color is provided with its corresponding HEX, RGB, CMYK, and Pantone values, which should be used as a reference to maintain consistency across both digital and print applications.

Typography

Typeface

Satoshi is a modern sans-serif typeface known for its clean, geometric structure and excellent readability. Its balanced design makes it highly versatile, suitable for both digital and print applications.

The typeface delivers a contemporary and professional look while maintaining clarity across different sizes and formats. With a wide range of weights, Satoshi allows for a clear typographic hierarchy, making it ideal for headlines, subheadlines, and body text.

Overall, Satoshi supports Encik Beku's brand identity by providing a visual language that is modern, structured, and easy to read, ensuring consistency across all communications.

Hierarchy

A clear typographic hierarchy ensures consistency across all communication. Using Satoshi across all levels provides a modern, clean, and highly readable visual language. The font supports clarity and flexibility across both digital and print applications.

Headline

Use Satoshi Black for headlines. Headlines should command attention and serve as the primary entry point to the content.

Subheadline

Use Satoshi Bold for subheadlines. Subheadlines provide support to the main idea and help guide the reader through the layout.

Body Text

Use Satoshi Medium for all body copy. This weight ensures clarity, readability, and comfort in longer text sections.
